- Flexible time-of-day tariff, maximum demand,
- DST (Daylight saving time) support, with automatic billing dates

System architecture

Prometer 100 offers various communication modules, such as RS-232 with output to power up terminal modem, RS-485 for multidrop connectivity and Ethernet for integrating into communication bus. The communication modules can be hot-plugged in field and locally or remotely configured for ids and IP addresses. Dual-socket support on Ethernet allows for simultaneous communication over MODBUS and DLMS through different clients. All communication ports can simultaneously transfer data at high speeds.
