

The image features a dark blue background with abstract, flowing, and layered geometric shapes that create a sense of depth and movement. The shapes are primarily in shades of blue, with some lighter highlights that suggest light reflecting off a glossy or metallic surface. The overall aesthetic is modern and technological.

Vaion

Vserver

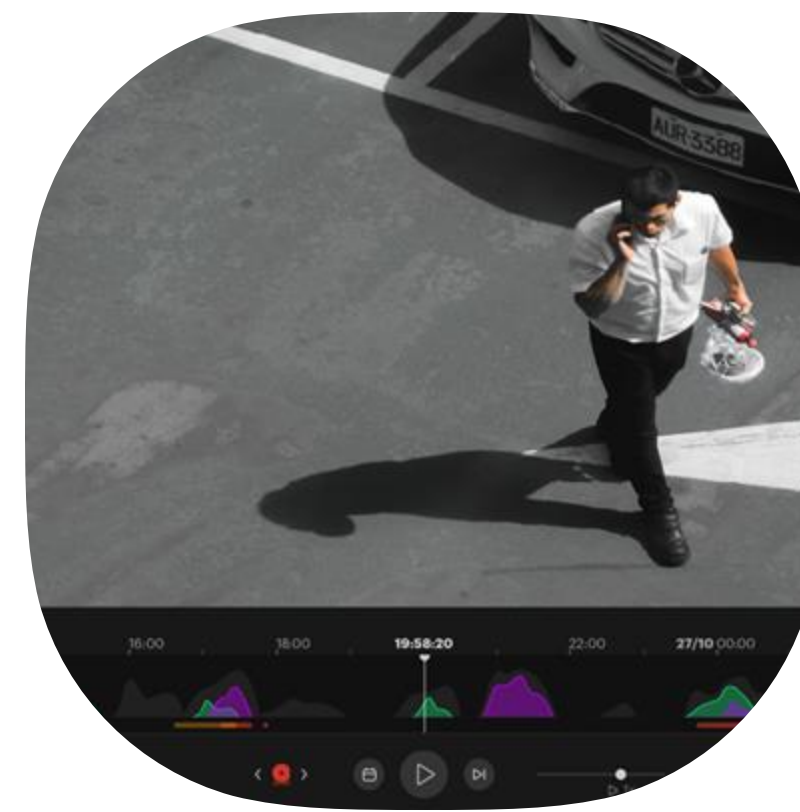

- Tailored and tested appliances for simplified deployment
- Pre-loaded with certificates for effortless security
- Hardware acceleration for machine learning and video encode/decode
- Simpler deployment, configuration and support

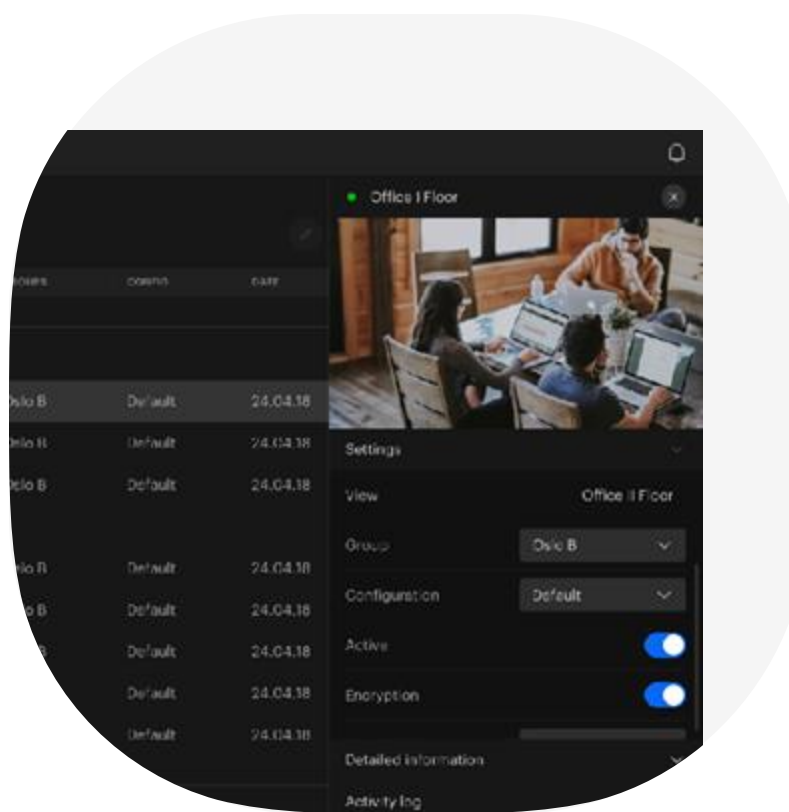

All cameras all the time in real time

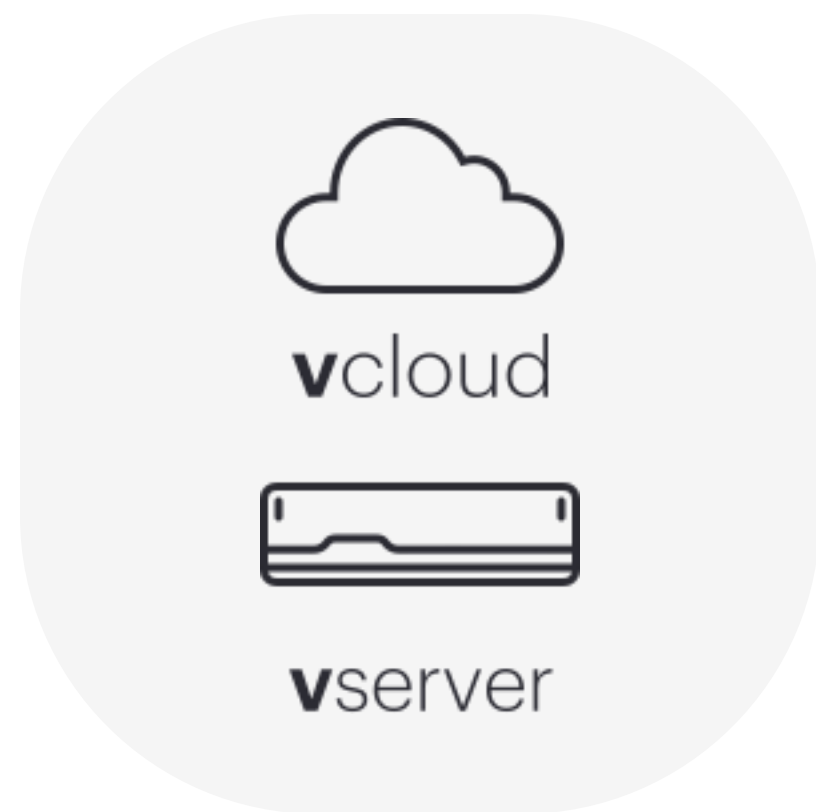

Smart map and video wall with real-time notifications

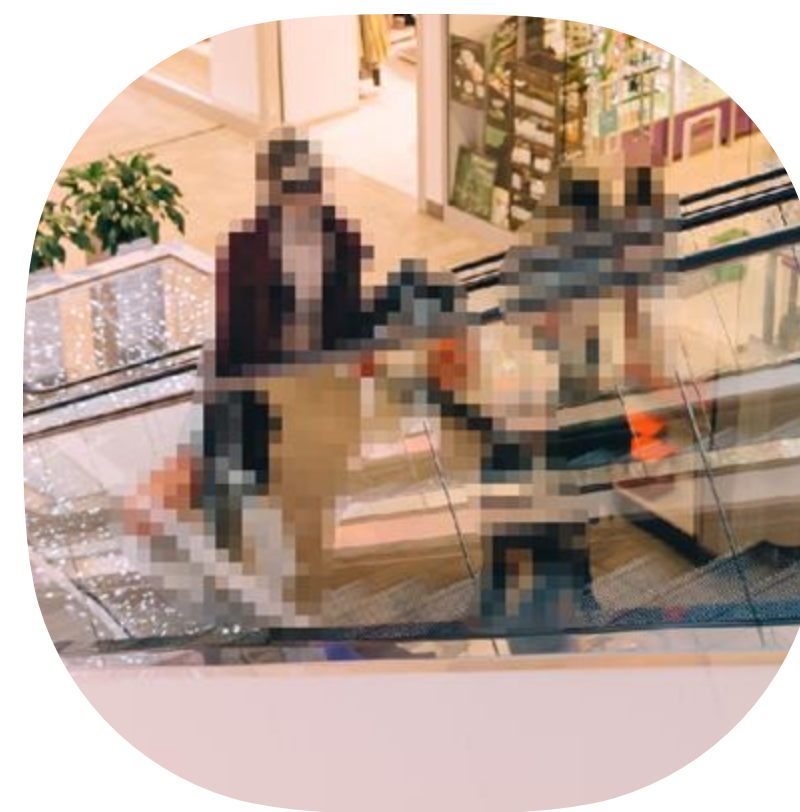

Smart timeline, event and similarity-based forensics

Simplicity through focused UI and automation

Made for flexible deployment and cloud

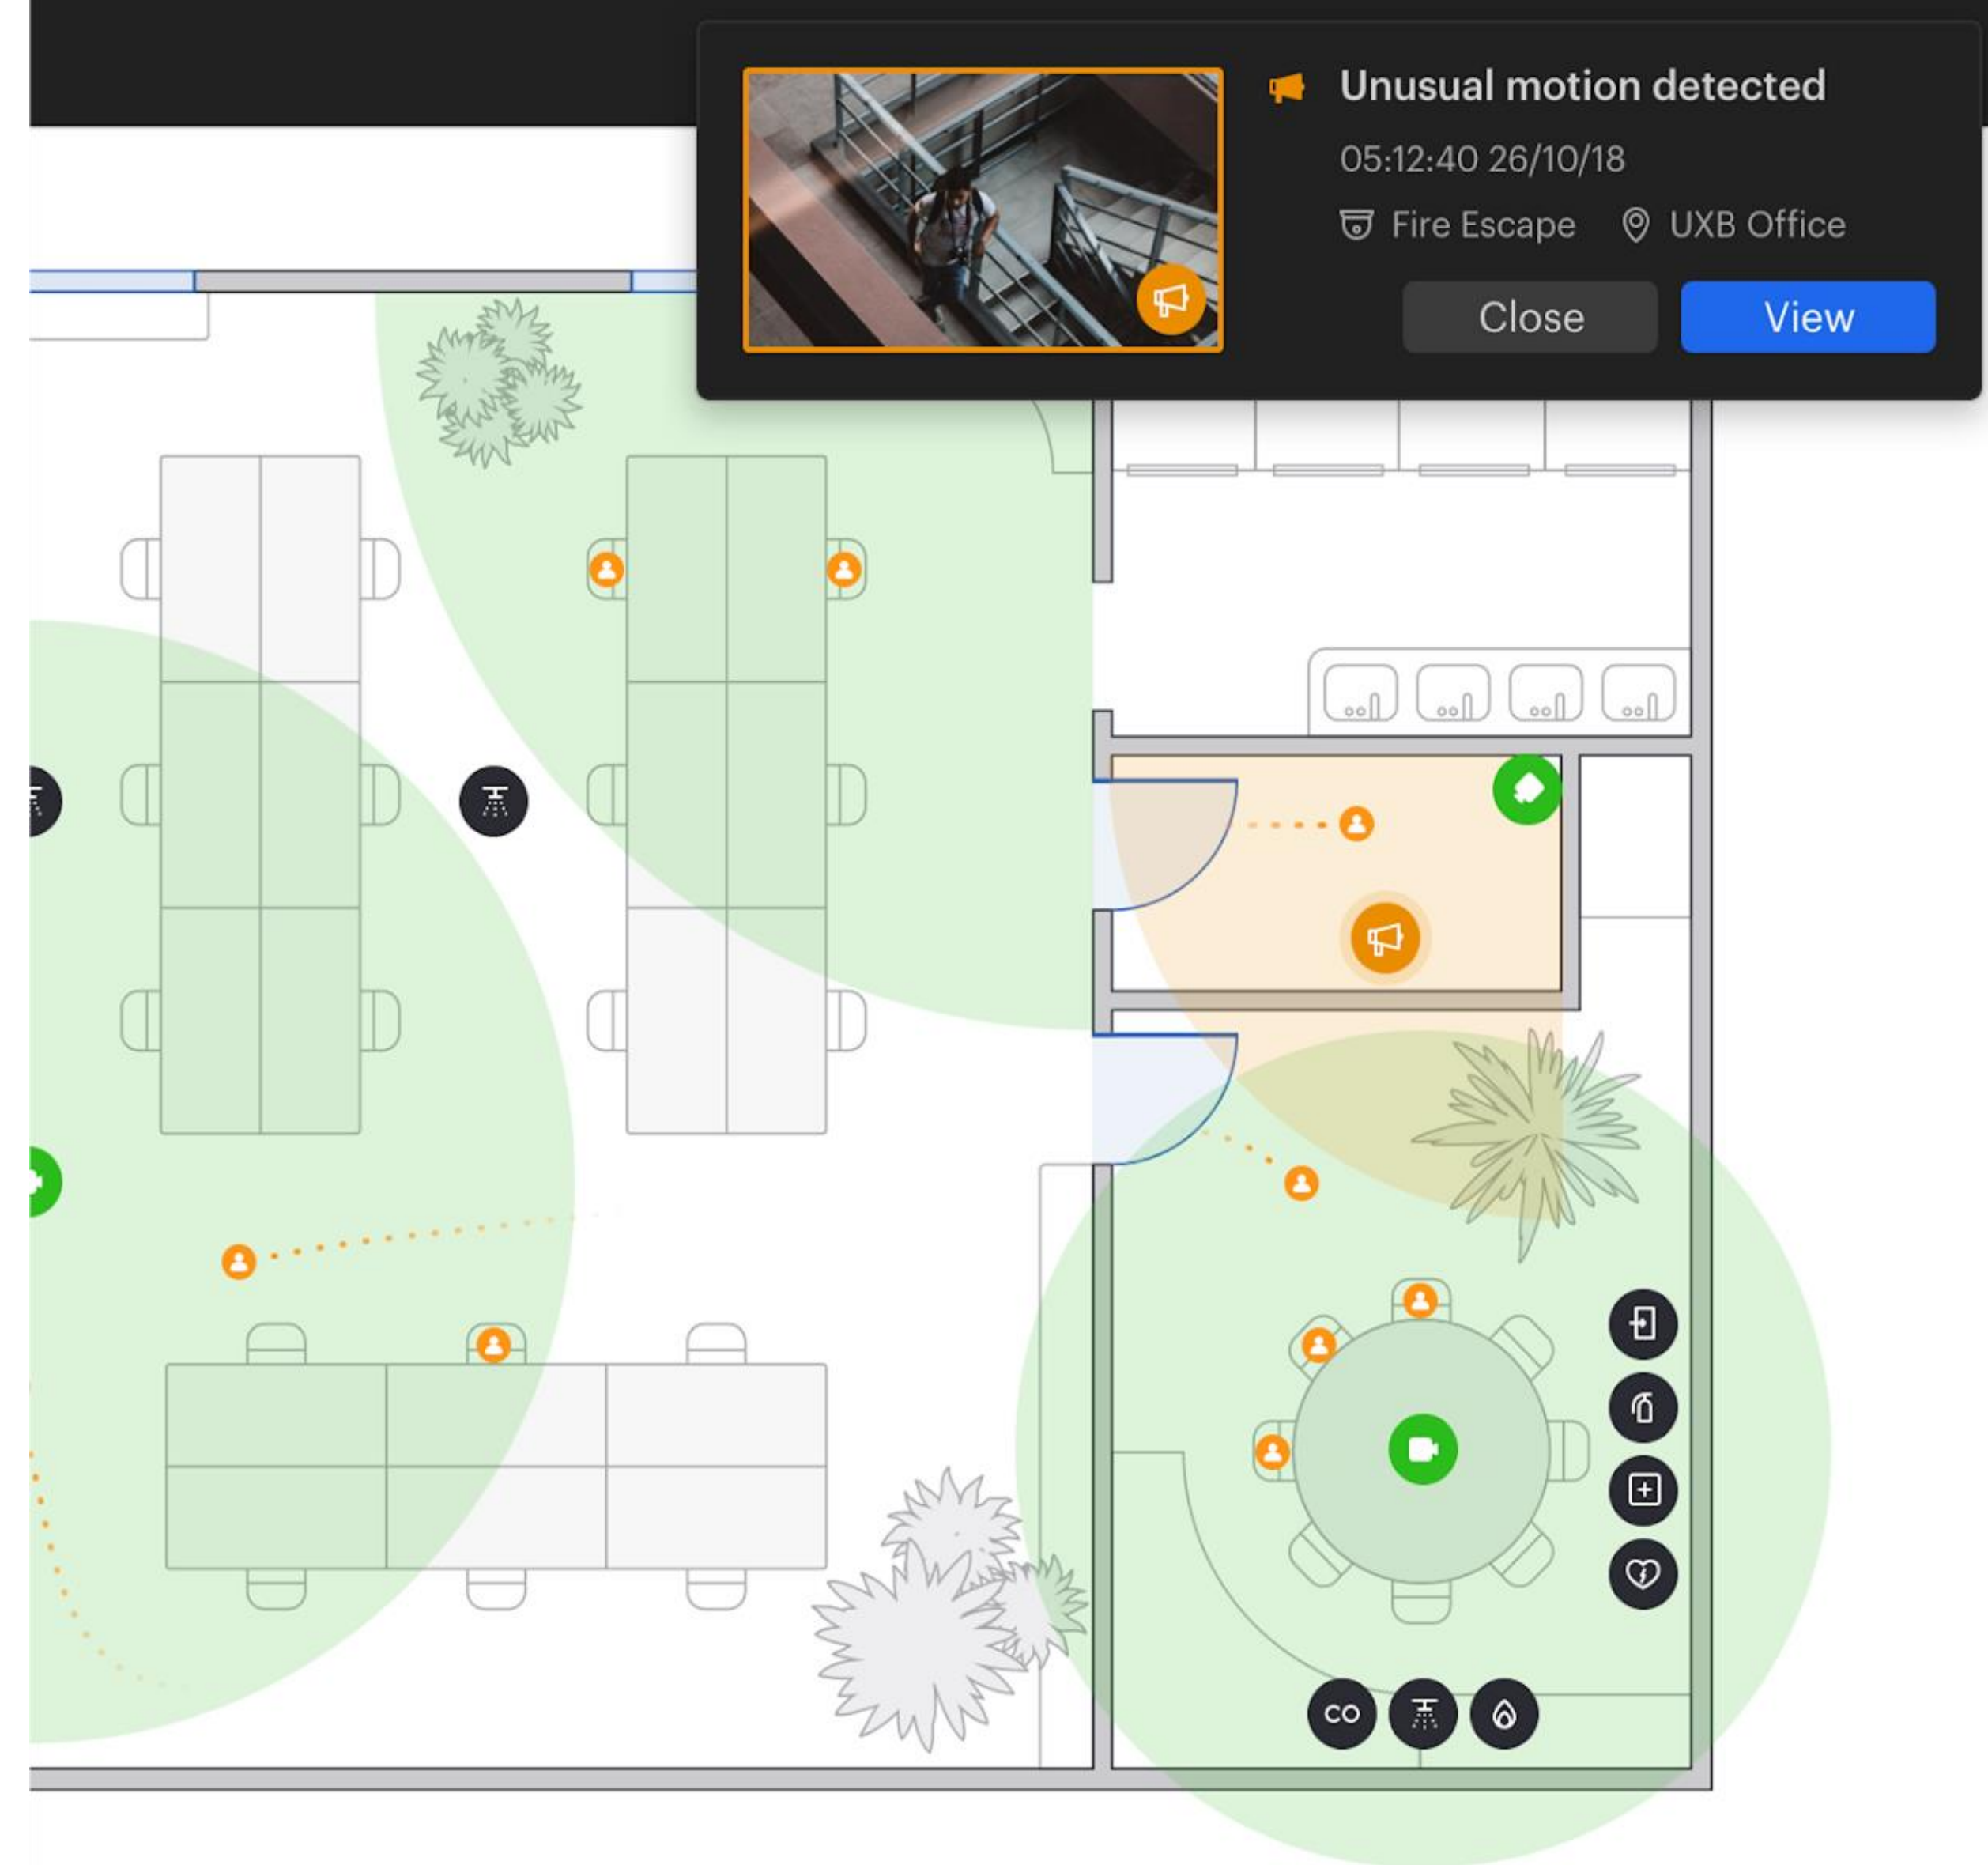

Secure and privacy proof by default

Vaion Vcore

Smart Map and Dynamic Video Wall

- Smart map for better situational awareness, with people presence, tracking and real-time alerts and notifications
- Dynamic video wall with alerts and notifications, bringing relevant video to attention of operator
- Alert operators of threats as or before events occur
- Pervasive real-time analytics and machine learning capabilities to move from recording to understanding

Smart timeline and event and similarity based search

- Search for objects, events, and similarity or by image
- Playback timeline with embedded thumbnails and people, vehicle and overall motion
- Rapid search results of what you are looking for, instead of browsing through hours of footage
- Find evidence using fewer resources

Seamless remote access

- Fully featured web client
- Simple and flexible user access rights management to give right level of access
- Customer-specific web portals for global and simple remote access
- Access from any mobile device, anytime, anywhere*

VAION

*Future capability

Highly secure and privacy proof

- Camera passwords set at initialization
- Tunnelling over HTTPS or SRTP for media transport encryption
- Stored recordings are always encrypted
- Enhanced privacy protection through privacy masking of real-time and exported video
- Detailed audit trails of all operator and admin trails
- Designed for GDPR compliance
